

It's minus 10 degrees.
You just left your house for
a weekend of skiing with
the family.

What will happen if your
furnace fails or you run out
of heating fuel?

Peace of Mind You Can't Beat.

SecureHEAT™ installation
and service, contact
your heating
system service
company
today.

Peace of Mind You Can't Beat.

SAMCO Home Monitoring Systems

www.secureheat.com

State-of-the-art oil and gas heat monitoring system like no other on the market today.

SecureHEAT™ not only alerts your heating system maintenance company if your fuel is low, it will also send an alert if your heating system fails, the temperature in your house drops, or the power goes out. The SecureHEAT unit also senses backup battery, wiring or sensor failure. Now that's *"Peace of Mind You Can't Beat"*.

SecureHEAT senses and sends alerts:

- If oil or gas systems fail
- If oil or gas tank levels drop
- If house temperature drops below 40° F
- If basement moisture levels are detected
- If battery backup, wiring or sensors fail

SecureHEAT sends alerts using:

- Standard phone lines
- DSL
- VOIP
- Digital Cable Phone

Peace of Mind You Can't Beat.

- 24/7 heating system monitor
- Easy installation on all common heating systems
- Low-cost installation and service
- Sends alerts via standard phone lines, DSL, VOIP and digital cable phone
- FCC-approved home monitoring system
